

Pat Hase on his way to a great session on Kings recently

Kings Lake at Shepherds Port has been fishing well with more anglers on the venue and improved results with good bream catches. Roach and small carp at times too. Probably the best it's been for a while after a slow start to the season.

Bear Lake providing its usual sport on all methods with carp, roach and Rudd feeding well. Some anglers catching carp on bread just for a change.

Shepherds Lake more of a struggle lately producing only a few good carp. Perhaps the increased fishing pressure and bait introduction making the fish less active. Springside beginning to improve. Although wind and rain not been the best conditions for summer fishing.

Roach, Rudd, perch on maggot with carp and a few Tench being tempted on this simplest of baits.

Tottenham was fishing well to but low water levels and algae bloom having an effect and reducing activity.

Not before Mark Wilson had a cracking session that included a 16lb carp.

Updates on information and Matches on KLAA Waters.

National matches which will bring top match anglers to our waters for matches and practice.

Hopefully the waters will produce and will be helped by more feed and more anglers on the bank and perhaps using new techniques and ideas, which we can all learn from.

Sunday June 22
